

Children of our Centre

Genet's 10,000 birr deposit

Genet's parents knew that she was mentally challenged when she was 10 years old. Before that they sent her to public school, but she couldn't cop up like others. Then they simply left her at home. In the meantime they took her to Emanuel Specialized Hospital.

The sooner they heard that there is a Center for Mentally Challenged Children, Genet's mother brought her to that place. During her stay at the center, attending Life and Work Skill Training, she was regularly attending her lessons. In fact she was very shy to communicate with others face to face; rather she only said few words. Through time she became very active and was able to respond properly.

Genet feeding a lamb by bottle

After she finished her three years training, we rehabilitated her with one milk cow. Now they multiplied and have sales of milk for the surrounding people. Genet has now 10,000 birr deposited in her account. Her parents plan for the future to expand the existing job and to plant oil extractor by the name of Genet.

Currently she is actively participating in all the duties of handling the cows and milk distribution for the customers. In addition to this she cleans all the utensil and can handle incoming calls and transfer the message properly.

Amanuel a child like others?

When Amanuel came to our centre the first time he was a malnourished child. At the age of 2.5 years his height was 70 cm and his weight was 5kg.

His situation changed when his mother was counselled by our Early Care staff to feed him balanced diet. After 8 months he was looking like a normal boy enjoying playing with others. His weight became 10 kg. Today he is visiting us from time to time. He attends the normal Kindergarten.

Amanuel 2.5 years old, malnourished.

The boy 8 months later.
